PROJECTS

College Fee Receipt Generator *[python,Tkinter,MongoDB]*

A Python-based GUI application to generate, view, update, and print college fee receipts. This system also provides academic reports and Excel export functionality.

Story Book Website *[HTML,CSS]*

The Story Book is a simple and attractive website developed using HTML and CSS. It contains six stories with individual pages, allowing users to explore and read different stories.

Personal Resume *[HTML,CSS]*

A personal resume website built using HTML and CSS to showcase my education, skills, projects, and career profile with a clean and elegant design.

CERTIFICATIONS

Python Full Stack Development

Accord Info Matrix, Chennai.

Completed Python Full Stack Development training, covering Python programming, HTML, CSS, JavaScript, DOM, React, Angular, and database management.

ACHIEVEMENTS

- Received a Software Development Award during College Day.
- Developed a College Fee Receipt Generator that is currently used in the college office.
